

Tariffs and Prices

Effective 1 October 2026 · prices include VAT

Kestrel Energy supplies electricity to homes across Yorkshire. All prices in this guide include VAT at 5%. Your bill is made up of two parts: the unit rate you pay for each kilowatt-hour (kWh) you use, and a daily standing charge that covers the cost of keeping your home connected to the grid.

Tariffs at a glance

Tariff	Meter	Unit rate	Standing charge
Kestrel Fixed	single-rate	24.5p/kWh at all times	53p per day
Kestrel Economy 7	two-rate	29.8p/kWh day 13.9p/kWh off-peak	55p per day
Kestrel Weekend Saver	two-rate	30.5p/kWh day 15.2p/kWh off-peak	57p per day
Kestrel Green	single-rate	26.2p/kWh at all times	53p per day

Kestrel Fixed

A single-rate tariff. Best for homes that use most of their electricity during the day.

Single unit rate: 24.5p per kWh at any time of day.

Standing charge: 53p per day. Perks: Unit rate fixed until 31 December 2027; No exit fees in the last 49 days of the contract.

Kestrel Economy 7

A two-rate tariff. Best for homes with storage heaters, a hot-water cylinder or an electric car charged overnight.

Day rate: 29.8p per kWh. Off-peak rate: 13.9p per kWh. Off-peak hours: 7 hours every night, from 00:30 to 07:30.

Standing charge: 55p per day. Perks: Cheap overnight electricity every day; Ideal for storage heaters and overnight EV charging.

Kestrel Weekend Saver

A two-rate tariff. Best for people who are out at work on weekdays and do most chores at the weekend.

Day rate: 30.5p per kWh. Off-peak rate: 15.2p per kWh. Off-peak hours: every night from 00:30 to 07:30, plus all day Saturday and Sunday.

Standing charge: 57p per day. Perks: Off-peak prices all weekend; Pays off when laundry and cooking happen at weekends.

Kestrel Green

A single-rate tariff. Best for customers who want their electricity matched with renewable generation.

Single unit rate: 26.2p per kWh at any time of day.

Standing charge: 53p per day. Perks: 100% renewable electricity backed by REGO certificates; Annual green-energy certificate for your home.

Choosing the right tariff

How you use electricity	Suggested tariff	Why
Mostly during the day, little running overnight	Kestrel Fixed	Lowest single rate, price fixed until the end of 2027
Storage heaters, hot-water cylinder or EV charged overnight – at least 35% of use at night	Kestrel Economy 7	Seven hours of cheap electricity every night
Out at work on weekdays, chores and cooking at weekends	Kestrel Weekend Saver	Off-peak prices all day Saturday and Sunday
Renewable electricity matters most	Kestrel Green	100% renewable, backed by REGO certificates

A two-rate tariff only saves money if enough of your usage falls in the off-peak window. For a typical home, Economy 7 starts to pay off when roughly 35% of usage is overnight, and Weekend Saver when roughly 43% falls overnight or at weekends. Below that, the higher day rate and standing charge cancel out the savings.

Changing tariff

You can change tariff free of charge once every 12 months in the Kestrel app or by speaking to our customer team. The new tariff starts on the first day of your next billing month. Moving from a single-rate to a two-rate tariff needs a compatible meter; if you have a smart meter we switch it remotely, otherwise we book a free meter exchange.
